Wahaj Ali

FULL-STACK ENGINEER

wahaj.ali96@yahoo.com | +92 307 5153811 | github.com/Wahaj-Ali | https://scorpion-dev.vercel.app

SUMMARY

Full-stack AI Engineer building and deploying production web apps with React, Next.js, Node.js, and Python. I own features end-to-end — AI integrations, backends, databases, and AWS — and ship growth systems for international clients: acquisition funnels, custom CRMs, and AI agents that turn more leads into paying customers.

SKILLS

Front-End: JavaScript, TypeScript, React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI, shadcn/ui, Shopify Polaris, Responsive Design, Reusable Component Architecture
Back-End: Node.js, Express JS, FastAPI, Python, Next JS, MongoDB, PostgreSQL, Supabase, OpenAI API
Testing and Quality: Jest, React Testing Library, RSpec, Test-Driven Development (TDD), Debugging, Chrome DevTools, WCAG Accessibility
Tools & Methods: Git, GitHub Actions, Docker, CI/CD, AWS, Vercel, Performance Optimization, Cross-Browser Compatibility
Professional: Technical Problem-Solving, Cross-Functional Collaboration, Remote Pair Programming, Project Ownership, Client Communication, Teamwork

EXPERIENCE

CCRIPT Agency — December 2024 – Present
Project Lead/Full-stack Engineer, Full-Time

- Developed, tested, deployed, and maintained 20+ full-stack web applications using Node. js, React/Next.js, FastAPI, Supabase, Firebase, and headless CMS platforms, owning features across the development lifecycle and resolving production issues.
- Collaborated directly with clients across 30+ projects, translating requirements into production-ready features and establishing structured feedback processes that reduced revision cycles by 35%.
- Implemented CI/CD pipelines with GitHub Actions and deployed Dockerized applications on AWS EC2, while reviewing code and resolving code issues to improve application reliability and maintainability.

SQA Agency — September 2024 – December 2024
Full-Stack Developer, Full-Time

- Developed a custom Shopify application using the MERN stack, building modular UI components and API integrations to configure automated store performance reports and schedule delivery across WhatsApp, email, and Slack.

Seven Koncepts — December 2023 – August 2024
Front-end Developer, Full-Time

- Developed 10+ pixel-perfect, responsive dashboard interfaces using React and Next.js, improving design-to-development handoff efficiency by 40% through reusable components and consistent UI implementation.
- Integrated 15+ third-party APIs into web applications, building maintainable frontend data flows and documenting integration specifications to streamline debugging, future development, and team onboarding.

PROJECTS

AI-Powered CRM & Analytics Dashboard
Next JS, Node JS, Express JS
- Built modular, responsive Next.js interfaces for CRM workflows and Meta Ads analytics, consolidating campaign performance and business insights into a unified dashboard.
- Integrated GoHighLevel and AI-powered agents to present complex data through intuitive interfaces and streamline business workflows.
- Developed reusable UI components and interactive data views, maintaining clear separation between presentation, application logic, and backend integrations.

Interactive Annotation Platform
Next JS, react-konva, JavaScript, TypeScript
- Developed a canvas-based annotation interface using React and React Konva, supporting precise visual interactions and complex editing workflow.
- Built reusable components for annotation tools and canvas interactions, improving UI consistency and simplifying future feature development.
- Integrated the frontend with backend services and packaged reusable code through GitHub Packages to support maintainable development and component reuse.

AI Video Generation Platform
Next JS, react-konva, JavaScript, TypeScript
- Built responsive Next.js interfaces for AI-powered short-video creation, guiding users through content generation and publishing workflows.
- Integrated OpenAI-powered image and text generation with text-to-speech functionality to deliver a cohesive, multi-step content creation experience.
- Connected frontend workflows with backend processing and automated publishing services, providing a unified interface for managing AI-generated video content.

Multi-Brand Business Websites
Next JS, react-konva, JavaScript, TypeScript
- Designed and developed multiple production-ready React and Next.js websites for client businesses, including Fully Inspected, Fully Constructed, and Instantly Insured, translating business requirements into responsive, user-focused interfaces.
- Built reusable UI components and consistent layouts across multiple web applications, ensuring maintainable frontend architecture, cross-device compatibility, and a cohesive user experience across client brands.

EDUCATION

MICROVERSE October 2022 – May 2023
Remote Full-Stack Web Development Program, Full-Time
- Spent 1300+ hours mastering algorithms, data structures, and full-stack development while simultaneously developing projects with Ruby, Rails, JavaScript, React, and Redux.

SSCIT, Islamabad, PK September 2015 – August 2020
Electrical Computer Engineering, B.Sc
- Relevant Coursework: Programming in C, OOP and Data Structures, Embedded Systems, Network Programming and DBMS.
